

1 in 3

the number of law firms reporting downtime & significant loss of billable hours because of a cyber-attack

29%

Increase in attacks on law firms from 2019 to 2020

36%

of law firms have reported malware infections in their systems

66%

of law firms have not adopted or implemented an incidence response plan

The Myota Converged DSP

Myota delivers simplified operational data security that allows organizations to vsimultaneously withstand attacks against their data and bounce back from cybersecurity events. Built on a platform that combines the tenants of Zero Trust Architecture, Shamir Secret Sharing, immutable redundant storage, and advanced data dispersion, Myota moves data protection from static, network-based perimeters to focus on users, assets, and resources. Myota keeps your data safe from attacks, even when other security controls fail.

Recent individual cyberattacks on law firms have impacted millions of files and cost tens of thousands of billable hours. As the legal industry modernizes IT infrastructure and leverages hybrid and multi-cloud architectures, ensuring data protection and regulatory compliance are more important than ever. Additionally, the explosive growth in unstructured data requires organizations to find new ways to manage and distribute this data while protecting themselves against cyber-attacks.

Myota is your key to Legal data protection.

Boosts enterprise immunity and resilience. Myota focuses upon keeping your valuable unstructured data yours. Unlike legacy prevention-oriented solutions, Myota's patent-pending method of information protection enables zero-trust, end-to-end-protection from a variety of external and insider threats. Easy to deploy and built to scale – Myota is designed to change the rules. Designed for consumption and scale, complement and enhance your existing data loss prevention and cloud security profile – without gateways, middleware or backups. Myota allows fine-grain control over security, storage and data governance. It's time for exponential information security.

Why Myota for Legal & Law Firms

Zero-Trust Infrastructure

Myota combines user and device access controls with patented microsharding technology that simultaneously renders data useless and gives organizations the ability to overcome any attack.

Decentralized Risk Management

Fully encrypted data shards and multiplexed data storage guard against information loss. Easily restore file versions. Compatible with immutable storage configurations. Seamless disaster recovery with zero downtime.

Cyber Resilience & Protection

Data protection, backup, and restore processes take up time and resources. Instead, data is protected through the durability of the cloud and the availability provided by Myota

Control & Availability

Granular controls to designate data & content dispersion, customer defined storage location and gated access while ensuring high availability to the data owner.
